COMFORT
FOR LIFE

DERMA CHAIR

Primum

PRODUCT PHILOSOPHY

It is the harmony of function, involving the five senses that help to create a comfortable patient atmosphere. A platform helps patients perform common everyday activities such as reading, watching television or taking coffee which help to lift their spirits prior to a clinical procedure.

The Lumens Medical chair is designed to make a patient almost unaware of the procedure going on. It creates a comfortable, safe and relaxing environment for both the patient and the clinical support team.

The Lumens Medical facilitates a healthy ergonomic posture and is thus perfect for patients needing to hold a position during a prolonged medical treatment.

EASY POSITIONING

Repositioning of the Lumens chair is very easy and the clearly defined instruction via the handset reduces the need for complicated staff and patient training.

Clinical staff can lock the handset keyboard control by using a magnetic key thus avoiding unwanted movement of the chair function required during some clinical procedures. (Optional)

Quick adjustment of the chair into the Trendelenburg position via one single button increases patient's safety in an emergency situation. (Optional)

HIGH VARIABILITY OF POSITIONS

Fast movement into the Trendelenburg position.

Superb patient comfort helps during clinical procedures.

Slow electrical adjustment into all the seating positions provides added patient comfort and assurance.

Quick and easy electrical height adjustment allows ease of access plus patient positioning via a single button, convenient for both patients and clinical staff
